Enjoy productivity

Océ VarioPrint 4000 Family

Efficient printing and copying in your production environment

Enjoy productivity in your corporate or commercial printroom.

Total productivity. The kind you get when your document system combines the highest reliability, throughput, ease-of-use, quality and applications. Whatever the type of documents you're producing: hard copy, digital, mixed. Whatever the media you're using: tabbed, mixed stock, color inserts, custom sizes.

And whatever your finishing requirements: stapled, punched, folded, or booklets. Designed to close the gap between light and very-high-volume production, the best-in-class Océ VarioPrint® 4000 family includes the Océ VarioPrint 4110 and the Océ VarioPrint 4120, which produce high-quality output at speeds of 106 and 120 pages per minute.

Reliability + Throughput + Ease of use

The Océ VarioPrint 4000 Family brings powerful, versatile printing, copying and scanning to your busy printroom or printshop. The system outperforms other systems in its class by delivering total productivity:

Reliability that saves you money

Reliable vacuum feed and air-separation technologies enable you to produce jobs at rated speed with no jams or other time-and money-wasting delays. Océ Copy Press technology, with its short paper path and error-free paper feed, provides proven reliability.

Throughput that lets you do more

Powered by the Océ PRISMAsync Controller, Océ VarioPrint 4000 systems support long, unattended runs, with productivity features like load-while-printing, tray switching and extremely easy next-job programming on the graphical user interface, all while the first job prints.

In addition the systems are built to support powerful throughput to produce documents at up to 120 ppm, even when duplexing. Additional throughput is available with extra paper input—up to 15,400 sheets from seven trays, which accommodate all sizes and types of media. Output capacity matches input; and in-line finishing adds professional flair.

+ Quality =

Total Productivity

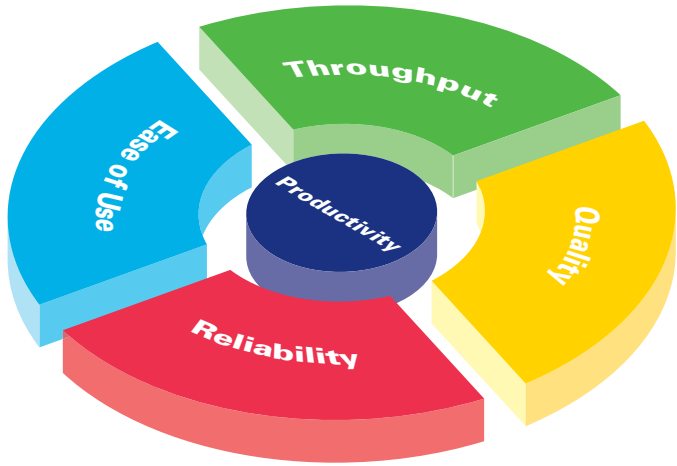

Ease-of-use that reduces costly errors

The system's dynamic, intuitive user interface and ergonomic design enable operators to work more precisely and comfortably. Users simply press one button to print, copy or scan. A page programming printer driver makes it easy to create even the most complex documents.

Quality that keeps customers coming back

Océ Copy Press technology actually presses the image right into your media for a cleaner, more professional result, at 1200 x 600 dpi and a maximum 141 lines per inch. Even fine halftones and dark areas appear crisp, precise and sure to please. Océ Image Logic® image optimization technology ensures consistently high quality print after print. Accurate, active paper registration produces perfect books and duplexed manuals and complex image placement. Together, these features deliver the quality you need to ensure that customers come back again and again.

Totally productive printing, copying and scanning

Applications that accelerate business

Make sure customers choose you for all of their jobs: printing, copying and scanning. Produce a full range of applications on an equally wide variety of media, including over-sized and custom media. Then offer them finishing options like stacking, stapling, booklet-making, folding and punching. Add more with optional Océ PRISMA®, integrated, adaptive software that provides total workflow management: scheduling, makeready, production and delivery.

Options that make the most of your investment

Financing your professional printing solution is just as important to your business as your choice in system configuration. Océ can help you acquire state-of-the-art copying and printing solutions for less. Solutions that give you the latest equipment, such as the Océ VarioPrint 4110 and 4120 systems, while conserving your capital for other core business activities. Now that's what we call financing you can enjoy!

Beyond the Ordinary

At Océ, sustainability and strategy go hand in hand. We're working hard to minimize our ecological footprint. Sustainability is an integral part of our overall success and that of our customers and business partners. Our track record all the way back to 1877 demonstrates our responsibility as a corporate citizen. That commitment is increasingly evident in the products we develop and manufacture and the services we provide. In our products and services to society. Through innovation in products and processes, we will continue to take sustainability the next step.

Printing for Professionals

Océ helps the people who make our world. Companies everywhere use Océ technical documentation systems in manufacturing, architecture, engineering and construction. Each week, high-speed Océ printing systems produce millions of transaction documents such as bank statements and utility bills. And in offices around the world, people use Océ professional document systems to keep the wheels of business and government turning. Océ is also at work in publishing on demand, newspaper production and wide format color for spectacular display graphics. It all helps our professional customers go 'Beyond the Ordinary' in printing and document management.
