

GFC imageCONTROL

Raise productivity and lower costs with this customized printing solution.

When your printers and multifunction devices are working at their best, your company can work at its best too. That's what imageCONTROL from the Gordon Flesch Company is all about.

With a thorough analysis of current printing capabilities and efficiencies, we can tailor a technology solution to meet your company's exact needs. It's a customized innovative plan with two simple aims: eliminate inefficient equipment and processes—and gain real cost savings.

imageCONTROL benefits

We design a plan that keeps your printing equipment working at optimal capacity. That means:

- Eliminating unnecessary equipment
- Increasing uptime with a healthier fleet
- Optimizing device placements
- Monitoring and adjusting to changing needs

Compare and save

With an imageCONTROL plan in hand, you can do a side-by-side comparison to your current printing fleet's cost. You will see objective statistics about:

- Cost per image
- Usage reports
- Trend patterns
- Device utilization
